

# **Mynx** series Mynx 5400/6500/7500

**Heavy Duty Vertical Machining Center** 

# **Heavy Duty Vertical Machining Center**

Heavy Duty Vertical Machining Center The Mynx series is designed to offer exceptionally high rigidity and powerful spindles that form the support for heavy-duty machining to satisfy our customers' demands for high productivity.

# Mynx 5400/6500/7500

Mynx 5400 #40 Mynx 6500 #50

Improved features found on the Mynx series include a wide selection of spindles, an increased toolstorage capacity on a cam-type tool changer, an extended Y stroke, an easy operation software package, and more compared to the previous models. Together they enable maximum machining capability and ease of operation for a spectrum of machining operations.

# **High Rigidity**

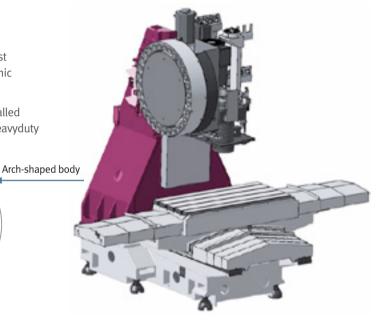

The highly-rigid body found on the Mynx series enables exceptionally heavy-duty machining.

Mynx 5400/6500/7500

## **High Rigidity**

The highly-rigid body structure is obtained by using the latest FEM analysis method, which optimizes the static and dynamic stiffness characteristics of the Mynx series.

The resulting arch-shaped body structure provides an unrivalled level of rigidity, enabling an unsurpassed performance in heavyduty machining.

## **High Rigidity Design**

A solid machine structure was realized through 3D-based computer simulation.

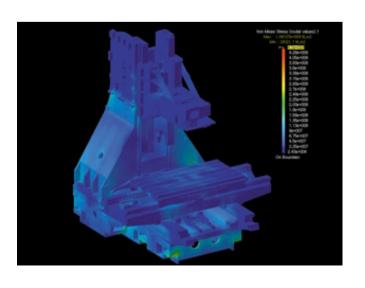

#### Static stiffness

The highly rigid body raises the static stiffness by 30% compared to the previous model.

#### Dynamic stiffness

Dynamic stiffness of the X, Y, and Z axes is significantly improved. High-frequency response is increased by 30% when compared to previous

## Broader box guideways

Compared to the previous models, the broader box guideways greatly improve the machine's dynamic characteristics.

> Mynx5400 Mynx6500

22% 5% **Z-axis Span width** 

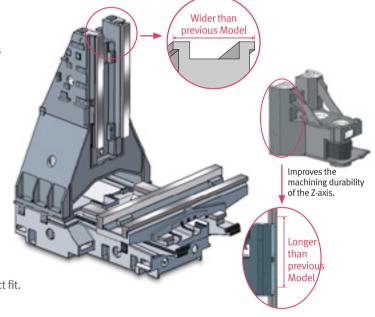

Z-axis Span Length

**32**%**↑ 8**%**↑** 

#### Scraping of surface

The sliding surface of each guideway is bonded with Rulon® 142 to reduce friction, then hand scraped for a perfect fit.

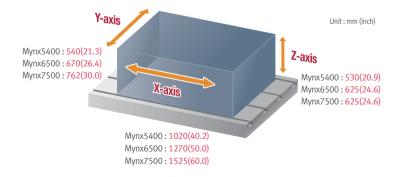

## Extension of the Y-axis stroke

The extended Y-axis stroke allows wider work area compard to the previous model.

## Rapid traverse

#### Belt driven std.

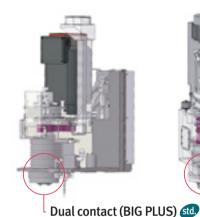

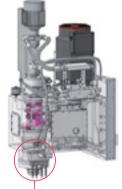

40 taper spindle is a true cartridge type unit supported by four precision class high speed bearings which are permanently greased and lubricated. The spindle is driven by a high torque A.C. motor delivering high power.

#### Gear driven on

The two-step gearbox generates an exceptionally high torque for the broadest spectrum of heavy-duty machining. (Only for taper #50)

The Big Plus system provides simultaneous dual tool-holder contact at the tapered side and the nose face of the spindle.

## A wide selection of spindles

The Mynx series' wide selection of spindles enables customers to optimize performance for various machining operations.

## **Machining Capacity**

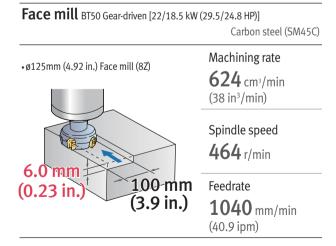

The Mynx series provides high machining performance in various cutting processes.

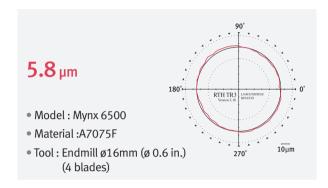

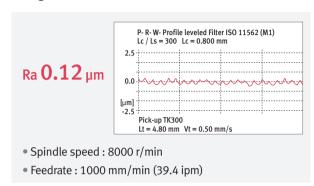

## **Machining Accuracy**

The Mynx series can be equipped with features that reduce thermal deformation for enhanced machining accuracy.

#### **Roundness**

#### Roughness

## Features provided to reduce thermal deformation

#### Fresh air

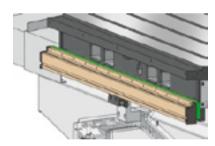

Heated air is forced from the casting and replaced by cooler fresh air. This minimizes the risk of thermal deformation, and reduces Z-axis thermal growth by 30% compared to the previous models.

#### Linear scale on

The coolant chiller lowers coolant temperature, helping to cool both the workpiece and tool during the machining operation.

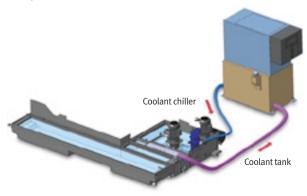

Resolution: 0.001 mm

#### Coolant chiller on

Closed loop feedback system by optical linear scales ensures supreme positioning accuracy. Available on the X, Y and Z axes.

#### Oil cooler on

The oil cooler keeps the coolant at a constant temperature. The oil circulates around the spindle and bearings to minimize thermal deformation of the spindle.

## **Automatic Tool Changer**

Increased tool storage capacity and shorter tool change time on a cam-type tool changer provides high machining productivity.

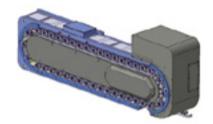

## A wide selection of tool magazine

## **Chip Disposal**

Chip control is important to increase productivity and to enhance the operator's working environment. The Mynx series offers many features to optimize chip disposal.

## Inner structure for effective chips and coolant flow

The inner structure of the Mynx series machines is designed to lead the flow of chips and coolant into a front-mounted chip pan for effective chip disposal.

## **Easy Set-up**

## Operating Console 400

Mynx 5400/6500 only

#### 10.4" Color TFT LCD Monitor as Standard Feature

The wide screen displays more useful infromation for the operator. Doosan's customized pages make setting up, operating, and machine condition monitoring easier.

#### 2 Pentium Board is standard. Easy retrofit of AICC or Easy Guide-i

#### Portable MPG

It makes workpiece setting easier for the operator

Easier ATC operation and maintenance.

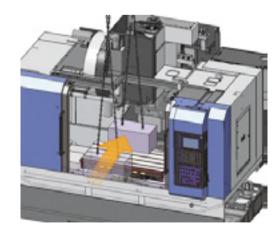

It gives much easier operation and maintenance for ATC.

- **5** PCMCIA Card
- **6** Embedded Ethernet / RS-232C
- Swivelling Operating Console

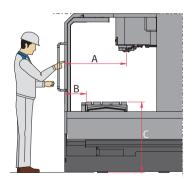

The easy-to-use operation panel can swivel 0-90°

## Workpiece loading

## Accessibility

Access to the tool post is optimized for operator's convenience.

Unit: mm (inch

	А	В	С
Mynx 5400	830 (32.7)	290 (11.4)	950 (37.4)

## **Easy Operation Package**

Doosan's easy operation software package is customized to provide fast and easy operation for tooling, workpiece and program setup. These features maximize productivity by minimizing time lost during process setup.

- Doosan Fanuc i series
- 10.4" color TFT LCD
- Part programming storage 1280m
- Embedded Ethernet

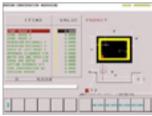

## **Programming**

#### G Code List

Operator can check the meaning of each G-code.

#### Pattern Cycle

It is easy to make pattern cycle program by this funciton.

#### M Code List

Operator can check the meaning of each M-code.

#### Calculator

Operator can calcute numerical formula in relation to arc and hole easily.

#### Tool Data Registry Table

Operator can edit & check the tool number of the tool magazine pot.

It makes "Engraving" programming easy.

## **Operation / Maintenance**

#### **Table Moving for Setup**

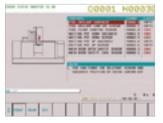

Enables quick and easy table movement to either of three positions during setup.

#### ATC Recovery Help

Allows easy recovery of ATC from ATC alarm status.

#### Sensor Status Monitor

Solenoid valve and sensor status can be checked without the electric diagram.

Alarm Guidance

The alarm remedy method for selected important alarms is displayed on the screen.

#### Easy NC Parameter Help

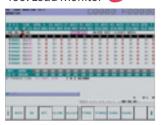

Operator can check some useful parameters for easy operation.

#### **Operation Rate**

Manages working and operation times for each operator.

#### Tool Load Monitor on

Damage to tools is minimized by monitoring the axis and spindle load during cutting operations.

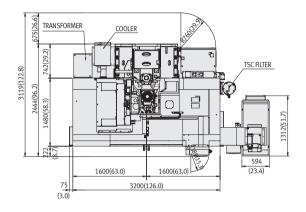

Tooling and the work piece measurement are operated through a conversational control screen.

• Some functions may be unavailable depending on machine model. Please contact Doosan for details.

#### **Standard Feature**

- Assembly & operation tools
- Coolant tank & chip pan
- Door interlock for safety
- Flood coolant system
- Installation parts
- Internal screw conveyor
- Operator call lamp (red, yellow, green)
- . . .
- Portable MPG
- Splash guard
- Work light
- X, Y, Z Absolute pulse coder

#### **Optional Feature**

- 4th axis preparation
- Automatic power off
- Automatic tool measurement
- Automatic workpiece measurement
- Chip conveyor & chip bucket
- EZ Guide i

- Minimum Quantity Lubrication
- Oil cooler & spindle head cooling system
- Oil skimmer
- Shower coolant
- Test bar
- Through spindle coolant system\*

- The specifications and information above-mentioned may be changed without prior notice.
- For more details, please contact Doosan

<sup>\*</sup> Please consult with technical engineer if the density of coolant is higher than 10%, as this could affect the filtration function

## **NC Unit Specifications**

## DOOSAN-FANUC i series

AXES CONTROL	
- Controlled axes	3 (X,Y,Z)
- Simultaneous controlled axes	
	Positioning (G00) / Linear interpolation (G01): 3 axes
	Circular interpolation (G02, G03): 2 axes
- Backlash compensation	
- Emergency stop / overtravel	
- Follow up	
- Least command increment	0.001mm / 0.0001"
- Least input increment	0.001mm / 0.0001"
- Machine lock	all axes / Z axis
- Mirror image	Reverse axis movement
	(setting screen and M - function)
- Stored pitch error compensation	
	Pitch error offset compensation for each axis
- Stored stroke check 1	Overtravel controlled by software
- Absolute pulse coder	
- Position switch	

INTERPOLATION & FEED FUNCTION	
- 2nd reference point return	G30
- Circular interpolation	G02, G03
- Cylinderical interpolation	G07.1
- Dwell	G04
- Exact stop check	G09, G61(mode)
- Feed per minute	mm / min
- Feedrate override (10% increments)	0 - 200 %
- Helical interpolation	
- Jog override (10% increments)	0 - 200 %
- Linear interpolation	G01
- Manual handle feed	Max. 3 units
- Manual handle feedrate	0.1 / 0.01 / 0.001mm
- Manual handle interruption	
- Override cancel	M48 / M49
- Positioning	G00
- Rapid traverse override	F0 (fine feed), 25 / 50 / 100 %
- Reference point return	G27, G28, G29
- Skip function	G31

SPINDLE & M-CODE FUNCTION	
- M- code function	M 3 digits
- Spindle orientation	
- Spindle serial output	
- Spindle speed command	S5 digits
- Spindle speed override (10% increments)	10 - 150%

TOOL FUNCTION	
- Cutter compensation C	G40, G41, G42
- Number of tool offsets	400 ea
- Tool length compensation	G43, G44, G49
- Tool life management	
- Tool number command	T2 digits
- Tool offset memory C	Geometry / Wear and Length / Radius offset memory
- Tool length measurement	G45 - G48

PROGRAMMING & EDITING FUNCTION	
- Absolute / Incremental programming	G90 / G91
- Auto. Coordinate system setting	
- Background editing	
- Canned cycle	G73, G74, G76, G80 - G89, G99
- Circular interpolation by radius programming	
- Custom macro B	
- Decimal point input	
- Extended part program editing	
- I / O interface	RS - 232C
- Inch / metric conversion	G20 / G21
- Label skip	
- Local / Machine coordinate system	G52 / G53

- Maximum commandable value	
	±99999.999mm (±9999.9999 inch)
- No. of Registered programs	400 ea
- Optional block skip	
- Optional stop	M01
- Part program storage	1280 m (4200ft) [512kB]
- Playback	
- Program number	O4-digits
- Program protect	
- Program stop / end	M00 / M02, M30
- Rigid tapping	G84, G74
- Sub program	Up to 4 nesting
- Tape code	ISO / EIA Automatic discrimination
- Thread cutting	
- Work coordinate system	G54 - G59

Others Funtion (Operation, Setti	ng & Display, etc)
- 3rd / 4th reference return	
- Additional work coordinate system	G54.1 P1 - 48 ( 48 pairs )
- AI APC(Advanced Preview Control)	20 block preview
- Alarm display	
- Alarm history display	
- Automatic corner override	G62
- Clock function	
- Coordinate rotation	G68, G69
- Cycle start / Feed hold	
- Display of PMC alarm message	
	Message display when PMC alarm occurred
- Dry run	
- Ethernet function	
- Graphic display	Tool path drawing
- Help function	
- High speed skip function	
- Loadmeter display	
- MDI / DISPLAY unit	10.4" color LCD, Keyboard for data input, soft-keys
- Memory card interface	
- Operation functions	Tape / Memory / MDI / Manual
- Operation history display	
- Optional angle chamfering / corner	R
- Polar coordinate command	G15 / G16
- Program restart	
- Programmable data input	Tool offset and work offset are entered by
	G10, G11
- Programmable mirror image	G50.1 / G51.1
- Run hour and part number display	
- Scaling	G50, G51
- Search function	Sequence NO. / Program NO.
- Self - diagnostic function	
- Servo setting screen	
- Single block	
- Single direction positioning	G60
- Stored stroke check 2	

선택 시방		
- Additional controlled axes	5 axes in total	
- AICC (AI Contour Control) with Hardware	40 block preview	
- EZ Guide i (Doosan infracore Conversational Programming Solution)		
with 10.4" Color TFT		
- Dynamic graphic display (w/10.4" Color LCD)  ⇒ When the EZ Guide i is used, the Dynamic graphic displa	Machining profile drawing y cannot application	
- Fast Data server		
- Fast Ethernet		
- Tool load monitoring function (Doosan)		

## FANUC 32i-A 🐠

XES CONTROL Controlled axes 3 (X,Y,Z)	- Part program storage 640 m (2,100 ft) [256 kB] n
Simultaneous controlled axes	- Program number 04-digit
Positioning (G00) / Linear interpolation (G01) : 3 axes Circular interpolation (G02, G03) : 2 axes	- Program protect
dacklash compensation	- Program stop / end M00 / M02, M3 - Programmable data input Tool offset and work offset are entered by G10, G1
Emergency stop / overtravel	<ul> <li>- Programmable data input</li> <li>- Sub program</li> <li>Tool offset and work offset are entered by G10, G1</li> <li>- Sub program</li> <li>- Up to 4 nesting</li> </ul>
follow up	- Tape code ISO / EIA Automatic discriminatio
east command increment 0.001mm / 0.0001"	- Work coordinate system G54 - G5
east input increment 0.001mm / 0.0001"	- Additional work coordinate system (48 Pair) G54.1 P1 - 48 pair
Machine lock all axes / Z axis	- Coordinate system rotation G68, G6
Mirror image Reverse axis movement (setting screen and M - function)	- Extended part program editing
Stored pitch error compensation Pitch error offset compensation for each axis	- Optional angle chamfering / corner R - Macro executor
Stored stroke check 1 Overtravel controlled by software	- Macro executor
Absolute pulse coder	
	Others Funtion (Operation, Setting & Display, etc)
TERPOLATION & FEED FUNCTION	- Alarm display - Alarm history display
nd reference point return G30	- Clock function
Circular interpolation G02, G03	- Cycle start / Feed hold
Owell G04	- Control axis detach
xact stop check G09, G61(mode)	- Display of PMC alarm message
eed per minute	Message display when PMC alarm occurre
Feedrate override (10% increments) 0 - 200 % og override (10% increments) 0 - 200 %	- Dry run
og override (10% increments) 0 - 200 % inear interpolation G01	- Embeded ethemet
Aanual handle feed 1 unit	- Graphic display Tool path drawin
Manual handle feed 1 unit x1, x10, x100 (per pulse)	- Help function - High speed skip function
Override cancel M48 / M49	- High speed skip function - Loadmeter display
Positioning G00	- MDI / DISPLAY unit 10.4" color LCD, Keyboard for data input, soft-key
Rapid traverse override F0 (fine feed), 25 / 50 / 100 %	- Memory card interface
Reference point return G27, G28, G29	- Operation functions Tape / Memory / MDI / Manua
Skip function G31	- Operation history display
Helical interpolation	- Program restart
AICC I 30 block preview Thread cutting, synchronous cutting	- Run hour and part number display
Program restart	- Search function Sequence NO. / Program NO
Automatic corner deceleration (Specify AI Contour control II)	- Self - diagnostic function - Servo setting screen
Feedrate clamp by circular acceleration (Specify Al Contour control II)	- Single block
inear ACC / DEC before interpolation (Specify AI Contour control II)	
Linear rice / Dec Delote interpotation (Openity Al Collitoul Collitou II)	- External data input
Linear ACC / DEC after interpolation	- External data input - Multi language display
Linear ACC / DEC after interpolation  Rapid traverse bell-shaped acceleration/deceleration  Smooth backlash compensation	- Multi language display - Stored stroke check 2
Linear ACC / DEC after interpolation Rapid traverse bell-shaped acceleration/deceleration	- Multi language display - Stored stroke check 2  OPTIONAL SPECIFICATIONS - 3-dimensional coordinate conversion - 3-dimensional tool compensation
inear ACC / DEC after interpolation Rapid traverse bell-shaped acceleration/deceleration Smooth backlash compensation  PINDLE & M-CODE FUNCTION M-code function Spindle orientation Spindle orientation Spindle serial output	- Multi language display - Stored stroke check 2  OPTIONAL SPECIFICATIONS - 3-dimensional coordinate conversion - 3-dimensional tool compensation - 3rd / 4th reference return
inear ACC / DEC after interpolation apid traverse bell-shaped acceleration/deceleration imooth backlash compensation  PINDLE & M-CODE FUNCTION  A-code function pindle orientation pindle serial output pindle speed command  S5 digits	- Multi language display - Stored stroke check 2  OPTIONAL SPECIFICATIONS - 3-dimensional coordinate conversion - 3-dimensional tool compensation - 3rd / 4th reference return - Addition of tool pairs for tool life management - Additional controlled axes  Max. 5 axes in tot.
inear ACC / DEC after interpolation lapid traverse bell-shaped acceleration/deceleration  Smooth backlash compensation  PINDLE & M-CODE FUNCTION  M- code function Spindle orientation Spindle serial output Spindle speed command S5 digits Spindle speed override (10% increments) 10 - 150%	- Multi language display - Stored stroke check 2  OPTIONAL SPECIFICATIONS - 3-dimensional coordinate conversion - 3-dimensional tool compensation - 3rd / 4th reference retum - Addition of tool pairs for tool life management - Additional controlled axes - Additional work coordinate system - Additional work coordinate system - G54.1 P1 - 300 (300 pairs
inear ACC / DEC after interpolation lapid traverse bell-shaped acceleration/deceleration smooth backlash compensation  PINDLE & M-CODE FUNCTION  M- code function Spindle orientation Spindle serial output Spindle speed command Spindle speed override (10% increments)  Spindle output switching	- Multi language display - Stored stroke check 2  OPTIONAL SPECIFICATIONS - 3-dimensional coordinate conversion - 3-dimensional tool compensation - 3rd / 4th reference retum - Addition of tool pairs for tool life management - Additional controlled axes - Additional work coordinate system - DSQ 1 (AICC II + Machining condition selection function
